Professional Summary

I'm a passionate Full Stack Developer skilled in React, Node.js, Express.js, and MongoDB. I build dynamic, scalable web applications with seamless frontend experiences and efficient backend logic. I continuously learn and adopt new technologies to create secure, high-performance solutions. My strength lies in integrating frontend and backend systems to deliver complete, modern web applications.

Skills

- **Frontend:** HTML/CSS, JavaScript, React.js, Tailwind CSS.
- **Backend:** Node.js, Express.js, MongoDB, SQL, Laravel.
- **Tools:** Git, Visual Studio, Postman

Education

Institute of Technology, University of Moratuwa(Information Technology)	2021 – 2024
J/ Methodist Girl's High School	2016 – 2018

Experience

Full Stack Web Developer (Loncey Tech , Jaffna) May 2025 – July 2025

I have developed scalable full-stack web applications using React, Laravel, Node.js, and MongoDB, translating business requirements into functional features with optimal UI/UX. I built RESTful APIs, ensured responsive design across devices, conducted testing and debugging, and integrated secure authentication. Experienced in Git and GitHub, Agile/Scrum collaboration, and delivering client-focused solutions on time.

Key Projects:

RIP Hall – Memorial Management Platform(React, Laravel, MySQL)

- Developed a platform for managing memorial records (names, dates, descriptions) using React (frontend) and Laravel (backend).
- Implemented search and filter functionalities for efficient record management.
- Designed mobile-first responsive layouts.

Jaathakam – Horoscope Platform(React, Laravel, MySQL)

- Built a personalized horoscope platform with structured database design for storing user profiles and horoscope data.
- Integrated dynamic API connectivity, enabling real-time horoscope generation.
- Enhanced application performance by optimizing database queries.

Velmurugan Cafe – POS System(React, Laravel, MySQL)

- Created a POS system with real-time inventory management, enabling café staff to track stock levels automatically.
- Implemented order creation, updating, and tracking features for smooth daily operations.
- Integrated secure payment processing with support for multiple methods.

- Delivered a responsive, user-friendly dashboard, improving staff efficiency.

Mobile App Developer (Speed IT Net , Jaffna)

Mar 2024 - Mar 2025

I have built cross-platform mobile applications using Flutter, focusing on clean and maintainable frontend codebases. I implemented intuitive user interfaces, applied design principles for better usability, optimized code for smoother performance, and conducted manual testing to ensure consistent experiences across iOS and Android. I also collaborated closely with designers to transform UI/UX designs into fully functional mobile applications.

Key Projects:

Nallathu – Advertisement Platform(Flutter)

- Developed a mobile marketplace with features like product listing, category browsing, favorites, and seller contact.
- Implemented user-friendly dashboards for buyers and sellers, increasing engagement.

Donation App(Flutter)

- Designed modules for requesting donations, tracking donations, and managing donor contributions.
- Enabled real-time donor-recipient matching, improving response time for urgent needs.

School Management System(Flutter)

- Built parent and staff dashboards for managing students, results, attendance, and payments.
- Created searchable records by registration number, grade, and term for quick access.

Home Service App(Flutter)

- Developed service booking modules for carpentry, electrical, plumbing, and cleaning services.
- Implemented service provider listings with ratings expertise filters to help users choose professionals.
- Built service history tracking and arrival time estimation features.
- Integrated multi-payment support, ensuring transparency and secure transactions.

Soft Skills

- Problem Solving
- Team Management
- Continuous Learning
- Team Collaboration
